

CS451 Milestone 2Peer Review

PARTNER: Refo Yudhanto

PARTNER TASKS:

1. Complete the Update.SQL file,
2. The business, check-In, friends, and business hours portion of the ParseAndInsert.py file.
3. Help update the Relations.SQL file as needed while completing project.
4. Update the ER model

MY TASKS:

1. Complete the Triggers.SQL file
2. The remaining tables in the ParseAndInsert.py file including updating some of the previous tables while testing.
3. Complete the User Interface application

PARTNER COMMUNICATION:

While completing the project we mostly communicated via facebook messenger, to decide what tasks each of us would do, and talk while doing our portions.

COMMENTS:

We worked well together on this project even though at times it felt as if I had a heavier load due to completing the application. I chose to do that however as I have previous experience with .NET and C# through an internship. We were each able to get our respective pieces done on time and in a way that it worked on each of our machines while Each working on our own github branch to avoid issues with commits and merging.

OVERALL ASSESSMENT:

Both of us put in the effort to complete this project on time even with current events and deserve an equal grade. I believe that we were able to complete the project requirements as much as possible.

If I were to give a letter grade to our work I would give us an A- as there were some minor bugs we couldn't quite figure out, and I would have liked to put more time into the style of the application.
